

Description

The FTR TMOV thermally protected varistors represent a new development in integrated circuit protection. Both versions are comprised of radial leaded Metal Oxide Varistors (MOVs) with an integrated thermally activated element designed to open in the event of overheating due to the abnormal overvoltage, limited current, conditions outlined in UL1449. The TMOV varistor's integrated thermal element, in conjunction with appropriate enclosure design, helps facilitate SPD module compliance to UL1449 for both cord connected and permanently connected applications.

Features

- TMOV integrated thermal protection device
- Fast responding to transient over-voltage
- High peak surge current rating up to 10KA
- Large absorbing transient energy capability
- Low clamping ratio and no follow-on current
- Three-lead version available for indication purposes
- Meets MSL level 1, per J-STD-020
- Operating Temperature: -55°C ~ +85°C
- Storage Temperature: -55°C ~ +125°C
- Agency recognition: UL 1449 4th /cUL /CQC

Applications

- SPD Products, Power supply, Telecommunication, Smart meter, or PLC protection
- Surge protection in consumer and industrial electronics
- Surge protection in electronic home appliances, gas and petroleum appliances
- Relay and electromagnetic valve surge absorption
- AC panel protection Modules
